

One innovation, three solutions, infinite possibilities.

Maximum convenience: You receive the milonizer as a complete package, including installation service. A milon technician will come to your location, connect the module and integrate it perfectly into your milon world. This service includes the addition of floor markings, which denote the correct standing position in front of the milonizer for all product variations. You don't have to worry about a thing, and you can get started immediately!

milonizer	STAGE	WALL	DESKTOP

A NEW DIMENSION.

The world of milon has been enriched by a ground-breaking innovation: The milonizer measures the user's body in an instant. All of the milon devices in

your studio will be preset to each user's anatomy in the blink of an eye. We call this the "five-second revolution" for your milon circuit.

FIVE, FOUR, THREE, TWO, ONE -

AND GO!

MAXIMUM MILON = ADVANTAGES FOR YOU.

A

Start:

To start with, the trainer will create a new client account in milon CARE - either using the classic chip-card method or with the innovative milon transponder bracelet.

B

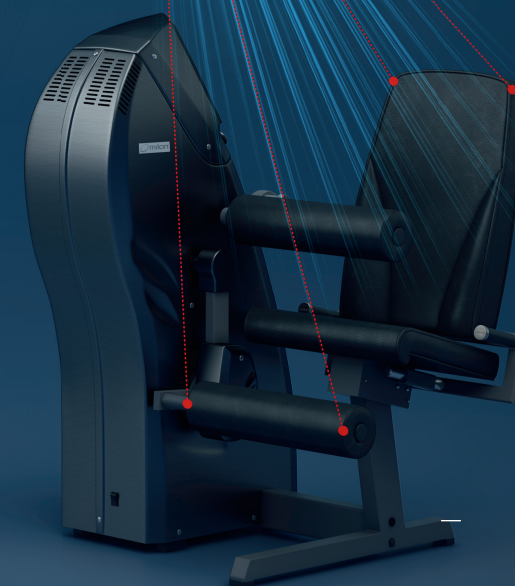

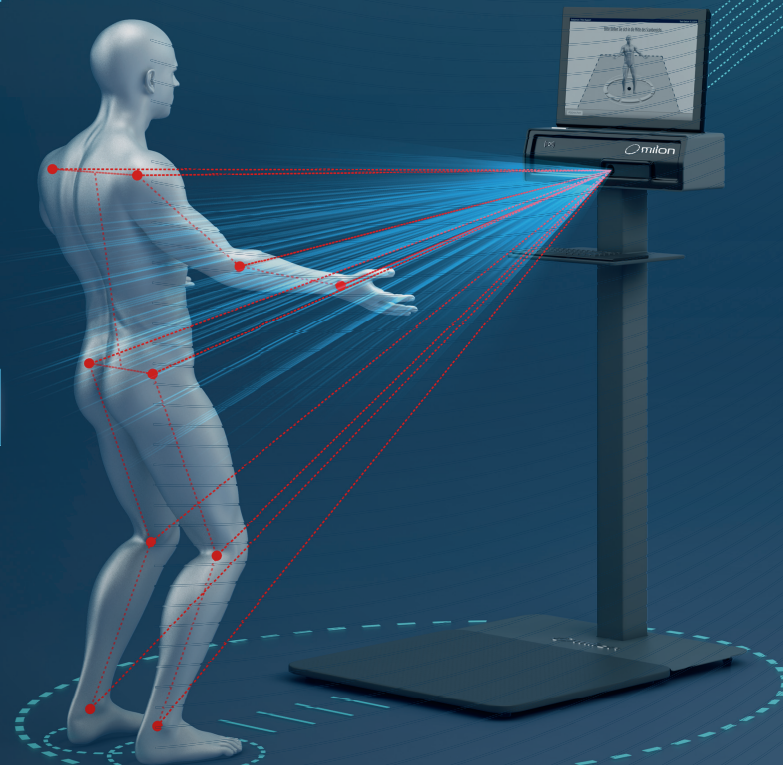

Measurement:

The user stands in front of the milonizer with bent arms and slightly bent knees. The system uses a camera to capture the joints and then calculates the relevant body lengths.

C

Discover:

The milonizer transfers the data to milon CARE in real time. This takes place automatically and requires no further clicks. When you login to a milon device, it will then be preset to the individual measurements of the user. The trainer can concentrate fully on setting the right training resistance.

Simple:

Cutting-edge technology for your studio. Create a client account, press start, perform measurements - and you are done. Get started with the training!

Safe:

The devices adjust automatically to suit each body. The trainer simply has to check the preset values.

Effective:

Automatic measurement minimises the initial effort. The entire process takes only five seconds.

This means:

The trainer has even more time for the client's individual training plan!
